1. **Project Name: Elder Medical Care**

2. **Team Members:**

Name	Student E-mail Address	Personal E-mail	Phone Number	Current Year in School	Major	Primary Contact
Jingchuan Zhou	Jingchuan_Zhou@student.uml.edu		8572690966	Master 1st year	Computer Science	√
Yang Meng	Yang_Meng@student.uml.edu	myishh@qq.com	9783282173	Master 1st year	Computer Science	

3. **Advisor(s)/Mentor(s): (Optional)**

Name	E-mail Address	Affiliation
Prof. Guanling Chen	glchen@cs.uml.edu	Computer Science Department

4. **Questions:**

    a. **Describe your idea/project.**

    Develop smart medical device to care elder's health condition, such as reminding them of the food prohibition and taking medicine on time

    b. **What type of issue/problem does your idea/project address?**

    Consumer product that provide medical help

    c. **What is unique about the way your idea/project addresses this problem?**

    There is no existing product which focus on elder people's health care

    d. **Who will benefit from your idea/project?**

    All the elder patient and their doctors

    e. **Where are you in the design or development of this idea/project?**

    We are working on the idea designing stage

    f. **Will you work on pursuing your idea/project after you graduate? Yes No Maybe (Check boxes then pop up below questions depending what they answer on the check box)**

        i. **If yes, how can/will your idea/project be sustained beyond the completion of your graduation?**

        ii. **If no, why will you be unable to work on or pursue this idea/project after you graduate?**

    √ ii. **If maybe, how might your idea/project be sustained after you graduate?**

    If our project could get support from some medical product company, including finance support and personnel support, it will be sustained.

    g. **Why is this idea/project important to you?**

    It is our first try to develop a project. Besides, we will be very happy if our product could really help those elder patient.
